

Medi-Load Cu250

Written by Administrator

Intrauterine devices are the most widely used reversible contraceptives in the world.

One of the commonly used copper bearing IUD is the Medi-Load Cu 250. A key feature of the Medi-Load Cu250 IUD models is the ease of insertion & minimum training needs for the service provider.

- Medi-Load comes ready for insertion in insertion tube, therefore less number of steps while inserting
- Nylon Suture is softer and hence is more comfortable for the couple
- packed Superior Tyvek pouch
- Geometric design of Medi-Load frame ensures lower expulsion rate
- Geometrical structure and insertion method lowers the probability of accidental perforation of fundus
- Printed insertion tube adds convenience and accuracy for providers
- Medi-Load Cu 250 offers long term protection up to 3 years
